## Report Summary

The California public university system consists of 23 campuses statewide within the California State University (CSU) system and 10 campuses within the University of California (UC) system. The Riverside City College campus has articulation agreements within both systems to assist our students in transferring in order to complete their undergraduate education. Currently, all ADJ courses in the RCC catalog are transferrable to the CSU system, and the following courses are transferrable to the UC system:

- ADJ1 Introduction to Administration of Justice
- ADJ3 Criminal Law
- ADJ5 Community Relations
- ADJ9 Law in American Society

For students interested in pursuing the remainder of their undergraduate degrees within the CSU or UC system, there are often many questions about the acceptance and transfer process. Students are encouraged to work closely with their Counselor and the Transfer Center. This report is meant to just provide information to students about undergraduate programs, course requirements, and course listings, as well as which campuses have academic programs similar to criminal justice or forensic science. This report does not include information on other peripheral programs of study, such as sociology or social work, so students interested in pursuing those types of undergraduate degree majors will not find that information within this report. That also extends to students interested in professional careers within law; this report does not include information on pre-law programs. Furthermore, the focus here is just on undergraduate degrees (bachelors-level programs). This report does not include information on graduate programs, extension programs, certificate or professional diploma programs.
